

Game Store

DESCRIPTION

Game Store is a full-stack web application that allows users to browse, search, and purchase video games online.

For Users:

- Register and login with JWT authentication
- Browse all games in a catalog with a search bar
- View detailed game pages with a media slideshow (images)
- Top 8 rated games displayed on the home page
- Add games to cart limited to one copy per game
- Cart shows live items with prices and total
- Place orders which automatically clear the cart
- Previously purchased games are marked as "Already Owned" so they can't be bought again
- Games already in cart are marked as "Already in Cart"

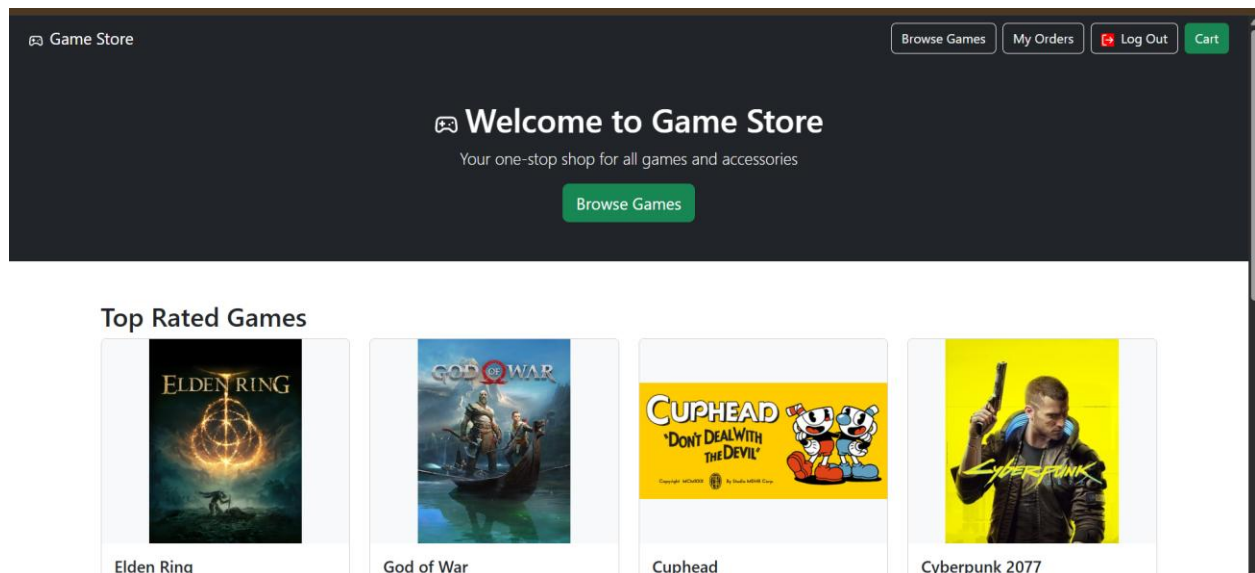

For Admins:

- Access a protected Admin Dashboard (role-based)
- Add new games to the store
- Edit existing games
- Delete games
- Admin button only visible to users with admin role

Pages

- Home: top 8 rated games
- Catalog: all games with search
- Game Details: full info, media slideshow, cart button
- Cart: cart items, total, place order
- Login/Logout: JWT-based auth
- Admin Dashboard: game management
